### CAUTIOUS RESPONSE INFORMATION

#### Common Synonyms
- Cupricin
- Cuprous cyanide

#### Solid powder
- White
- Sinks in water.

**KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID AND DUST. Notify local health and pollution control agencies. Protect water intakes.**

| Fire | Not flammable. POISONOUS GASES MAY BE PRODUCED WHEN HEATED. |
| Exposure | CALL FOR MEDICAL AID. |
| | DUST |
| | If inhaled, causes dizziness or loss of consciousness. |
| | If in eyes, keep eyelids open and flush with plenty of water. |
| | If breathing has stopped, give artificial respiration. |
| | If breathing is difficult, give oxygen. |
| | SOLID |
| | POISONOUS IF SWALLOWED. |
| | Irritating to skin and eyes. |
| | If swallowed, causes dizziness or loss of consciousness. |
| | Remove contaminated clothing and shoes. |
| | Flush affected areas with plenty of water. |
| | If INJURED, hold eyelids open and flush with plenty of water. |
| | If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. |
| | If SWALLOWED and victim is UNCONSCIOUS or HAVING CONVulsIONS, do nothing except keep victim warm. |

**Effect of low concentrations on aquatic life is unknown.** May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

#### 3.1 Personal Protective Equipment
- Dust respirator; protective goggles or face mask; protective clothing.

#### 3.2 Symptoms Following Exposure
- Following severe exposure to dust, symptoms of cyanide poisoning may develop (see ingestion). Ingestion causes anxiety, confusion, dizziness, sudden loss of consciousness, odor of bitter almonds on breath or in vomitus, rapid weak pulse, convulsions, and paralysis. Contact with eyes causes irritation.

#### 3.3 Treatment of Exposure
- Get medical attention after all exposures to this substance. INHALATION: remove victim to fresh air. INGESTION: if breathing has stopped, begin artificial respiration immediately; administer by inhalation any nitrite pearls for 15-30 seconds of every minute, while a sodium nitrite solution is being prepared. Discontinue any nitrite and immediately inject intravenously 10 ml of a 3% solution of sodium nitrite (nitrosylate) over a period of 2 to 4 min.; do not remove needle; through same needle infuse 50 ml of a 25% aqueous soln. of sodium thiosulfate; injection should take about 10 min. (Concentrations of 5-50% are permissible if total dose is approx. 12 grams.) Oxygen therapy may be of value in combination with the above. If symptoms recur, repeat injections of nitrite and thiosulfate at half the above doses. EYES: flush with water for at least 15 min. SKIN: flush with water; wash with soap and water.
